

The impact of the Sports Premium Funding 2018-2019 at New Longton All Saints'

The impact of the Sport Premium Funding is as follows:

Teachers have continued to be upskilled in the teaching of Physical Education (P.E). Sports Skills Academy (SSA) have been employed 1x weekly to deliver P.E sessions to both Key Stages. Although staff were happy with last year's support from South Ribble Coaches it was noted from staff feedback that they and the children would benefit from having constant coaches. Also from feedback from pupil interviews it was noted that the less active children would like to experience a wider range of unusual sports which (SSA) can provide.

All Year 5 children have been trained as Play Leaders. This means that they can work with children in LKS2 and KS1 at playtimes to ensure they are active and continuing to develop fundamentals of movement whilst building upon their love and enjoyment of sport. Sport Councillors have been trained in Year 5 to deliver and support our half termly Intra Competitions and to feedback pupil voice so that we can nurture this lifelong love of P.E and sport for our children.

We have bought in to our local sports offer which has meant we have been able to attend a vast range of Inter competitions for children across both Key Stages. This has been especially valuable as it has allowed our children to experience competition at a young age, against themselves and as a team representing the school.

LKS2 children go swimming for a term, any children who do not reach the requirements of the National Curriculum at the end of the terms session are invited to continue swimming with tailored top up sessions to help them obtain this mark. Currently 100% of our Year 6 children can swim 25 metres confidently, use a range of strokes and perform self-rescue in different water based situations.

An outcome from pupil voice was that children wanted to be able to be active outdoors for a larger part of the school day. A part section of this year's and next year's Sport Premium is going towards an outdoor area which is currently being built at the top area of our school playing field. This area will be used to help promote the daily mile, well-being, mindfulness and will link in with Forest Schools which will further encourage children to develop a lifelong love for the outdoors and being active.
